About Us:

- H A Z Scrap Trading L L C was incepted with an aim to deliver end to end solutions in waste recycling management in a cost effective way to clients across the globe. We want to create outstanding value for our customers, employees, stakeholders and the global community by leveraging our expertise in e-waste, specialized waste, data security, value recovery and environmental compliance. Apart from our traditional recycling management solutions, for the rapidly growing IT sector we can offer total asset management of used IT equipments starting from collection to recycling. We value our customers and with uncompromised dedication & continuous effort, we deliver all the support till the satisfaction. We are an environmental conscious company established in 2019 with rich industry experience in recycling and also Dubai Municipality and TADWEER approved company for safe disposal of waste materials . We are authorized to provide our customers with statutory certificates for the waste destruction and recycling.

Our solutions are custom made to suit your requirements, we are cost effective and efficient in delivering an Eco-friendly solution to all your recycling needs.

Mission & Vision

Let's dive in

MISSION

To address the challenge of advancing recycling efforts, we will embrace innovative techniques that prioritize both environmental sustainability and human well-being.

VISION

To deliver comprehensive waste recycling solutions globally, aimed at safeguarding our environment and preserving our ecosystem.

OUR VALUES

Teamwork

We believe in collective education and motivation. By working together we deliver best quality service.

Integrity

Honesty is one of the most important value for our business to keep moving forward.

Passion

We are passionate about everything we do which includes providing our clients with the best of our services to fulfill their requirements.

The background is a vibrant, futuristic cityscape. In the foreground, there are various architectural elements like a large, curved, perforated structure and several circular platforms. The middle ground features a dense urban area with a prominent, tall, dark skyscraper. In the background, there are wind turbines and flying cars against a blue sky with clouds. A large white circle is centered over the image, containing text. There are also several colored circles (orange, blue, grey) scattered around the main circle.

HAZ Scrap was great to work with. Areeb was my representative and they anticipated my needs and worked diligently to fix my Waste Management issue

E-waste Recycling or WEEE

E-waste is nothing but electrical or electronic equipment that has been discarded by consumers and businesses/corporates. Such items can be in working or in poor conditions that are generated from unsold items in the stores, surplus or defective goods discarded by manufacturers.

Risks involved:

Most of the electronic items contain toxic substances like lead, cadmium, mercury, etc.

When E-waste is not disposed of safely, these are the risks involved:

1. They pose high environmental risks affecting land, sea, and air.
2. Leaching: toxic substances from e-waste traces into the ground below the landfill and eventually mix with the groundwater, causing metal poisoning affecting marine and wildlife.

H A Z Scrap is the foremost Global E-Waste Management Company; it provides integrated solutions for e-waste. We are committed to ensuring that the latest technological advances in our field are applied in the process, to maximize our contribution to making the earth a better place for all of us.

How to minimize E-waste?

Instead of throwing away devices that contain a battery or a plug opt for recycling with us.

- 01 We collect E-waste from large companies and households
- 02 Carefully transport it to our processing facility
- 03 Recycle them, and extract the raw materials which help in the production of new devices. Thereby reducing the impact on the environment and the economy.

H A Z Scrap accepts all types of e-waste regardless of the quantity.

Our Services can be availed by MNCs | Software and Hardware Companies | Industries | Government and Aides Organizations | Institutions | Hospitals | Households | Individuals | Schools | Universities

IT Asset Disposal Management (ITAD)

As individuals and cooperatives want to adopt modern versions of technology that are emerging ever so rapidly, existing technologies become outdated very quickly. It is no longer appropriate for organizations to throw away old technology or simply move on.

Our processing facility at H A Z Scrap is well equipped to offer the following services:

- **IT Asset Recovery**
- **Device Deployment**
- **Data Deletion**
- **Hardware Destruction**

We aim to make it quick, easy and straightforward for our customers to handle the inward and outward movement of IT properties, whether it involves a leasing company's stringent specifications or the simple disposal of unwanted systems. Let's make a sustainable impact by giving a second life to your old IT Equipment and creating a greener home.

Data Wiping and Protection Policy

Information can be stored in everyday items such as desktops, laptops, printers, and mobile phones. These devices that carry sensitive corporate or individual data can pose a serious data security risk. H A Z Scrap follows a series of stringent process of collecting the devices, safely transporting it to our processing facility, and wipe data adhering to international standards of data protection.

Considering the sensitivity of the process, we ensure that our staffs follow strict protocols whilst data wiping. We also guarantee that your data are permanently wiped from magnetic disks and solid-state drives. Any non-compliance or violations regarding the policy our employees will be subject to disciplinary action.

What is Data Destruction?

When you destroy data, the goal is to make it totally unreadable regardless of the form of electronic media on which it was originally stored.

DESTRUCTION SERVICES FOR ALL TYPE OF PRODUCTS NOW AVAILABLE IN U.A.E

LET US INSPECT YOUR
PRODUCTS AT
ANYTIME ANYWHERE

ALL PACKAGES INCLUDES

- COLLECTION OF PRODUCTS
- DESTRUCTION OF PRODUCTS
- DISPOSAL IN MUNICIPALITY YARD
- PROVISION OF DESTRUCTION CERTIFICATE
- VIDEO AND PHOTOGRAPHY PROOF OF DESTRUCTION
- CUSTOMER SUPPORT

Special Waste Recycling and Brand Protection

Businesses face challenges of discarding special waste such as expired goods, low shelf-life products, manufacturing defect products, and counterfeit goods. They are burdened with a responsibility to fulfill their CSR policies as to dispose them in a safely manner that's both economically and environmentally responsible.

What we do:

Here at H A Z Scrap, we offer brand protection, meaning we ensure that products like soaps, shampoos, perfumes, cosmetics, garments, speakers, headphones, auto parts, furniture etc., are dismantled and destroyed for recycling purposes.

We accept various types of items, including the ones below:

Commercial Items:

- | | | |
|---------------------|----------------------------|--------------------------------------------------------|
| - Counterfeit goods | - Computer and Accessories | - Personal care products like perfumes and body creams |
| - Branded Materials | - Watches and Jewelry | - Apparels and Accessories |
| - Optical Media | - Handbags and Wallets | |
| | - Consumer Electronics | |

Industrial Items:

- Auto parts : brake pads, engine oil, oil filters and more
- Heavy Duty Machinery : machinery parts, and more
- Hospital Equipment : scanners, monitoring devices, CT scanners, and more

Batteries Recycling

Batteries contains several hazardous heavy metals that can pose a grave threat to the environment once it ends in the landfill. We provide the ideal solution for not tossing batteries into a bin. We operate lead-acid and Li-ion batteries at H A Z Scrap we provide services customized to organizational needs.

What we do: We collect unused or disposed batteries and transport them to our processing facility, from which valuable metals are recovered and are converted into raw materials that can be used for new production cycle.

What we accept:

We accept batteries such as:

Lithium-ion

Lead-acid

Alkaline & Carbon Zinc

Dry Cell Batteries

Cable Recycling

We specialize in the recycling of waste cable & copper of all types; cables from household, armored, heavy-duty cables, data/communications cables, and copper tubing providing you a one-stop solution for disposing of all your waste cables.

Our target is to maximize reclamation and reuse copper and surrounding materials as much as possible and minimize the impact on the environment. This process produces clean plastic granules and 99.9% clean copper which are used in various applications and new products, thereby eliminating the need for landfills.

Think Green

BATTERY RECYCLING

Every year over
15 BILLION

batteries are purchased worldwide.

Which is about **180,000** tons of batteries
That's **1,500** times as heavy as a Blue Whale!

Batteries contain **corrosive materials and heavy metals** that can contaminate the environment.

THEY CONTAIN METALS SUCH AS:

Zinc

Steel

Manganese

These metals can be recycled for use in other applications

THE IMPORTANCE OF RECYCLING BATTERIES:

- ⚡ Recycled batteries can be reused to make new products
- ⚡ Recycled batteries mean less materials going into landfills
- ⚡ Recycled batteries conserve natural resources
- ⚡ Recycled batteries can be used to produce energy

DIFFERENT TYPES OF BATTERIES TO RECYCLE:

Alkaline

Button

Lithium

Lead-Acid

DID YOU KNOW?

Rechargeable batteries are less harmful to the environment because they reduce the total number of batteries manufactured and entering the waste stream.

Goals for Q2

Business opportunities

- Increase customer satisfaction by 50%
- Maintain growth
- Create Awareness about sustainability

Added priorities

- Decrease the number of rotations by at least 2
- Ensure the cost of development stays below budget
- Brand Development
- Teach waste management

Employee priorities

- Interns begin
- Team outing
- Sports tournaments
- Big Game watching party

Summary

We're delivering for our customers

Last year we supported hundreds of customers and recycled 15,000 Tons

Our customers keep coming back

We increased customer retention by 20%

Our team is growing

We welcomed 3 new team members last quarter

Our business is good

Profits are up in the last quarter by 12%

We're getting our work done

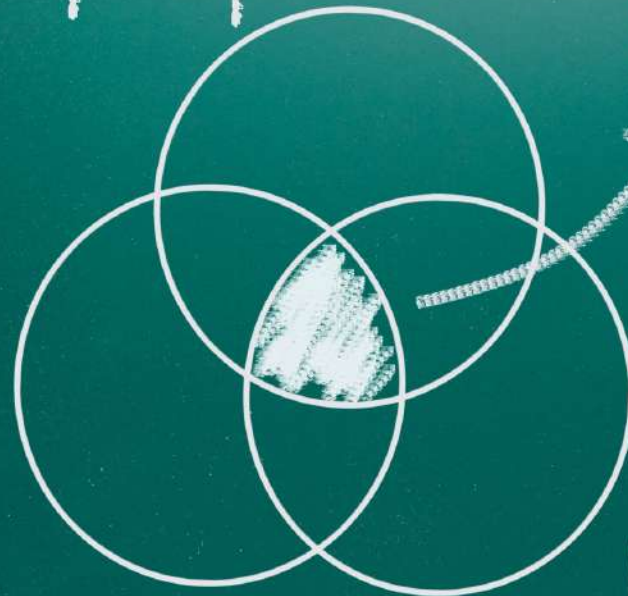

We finished the consolidation project

We're leaders

We are top leaders in the industry across the board
